Time Management
Teamwork and Result oriented
Excellent communication
Dynamic, Curious and Insightful
Decision Making
Leadership and Flexibility

TECHNICAL SKILLS

• Big Data Analytics

R
SQL
Python

• Business Intelligence

Excel
Power BI
Tableau

• Process and Productivity

Office 365
Jira
Google Workspace

SUMMARY

A skilled Data and Business Analyst with over five years of experience, I have a proven track record of transforming complex data into actionable insights. My expertise spans various domains, including client processing, regulatory compliance (such as KYC/CDD/AML), and business analytics.

Proficient in data visualization and reporting, I use various data analysis tools, including Power BI and Tableau, to create insightful visualizations and achieve KPIs and targets. I am well-versed in data manipulation and database querying with SQL, and hands-on experience with R programming for big data analysis. My unwavering commitment to excellence and passion for data-driven insights make me a valuable asset to any organization seeking a seasoned Analyst with a diverse skill set.

WORK EXPERIENCE

VIALTO PARTNERS SP.Z.O.O
Katowice, Poland

Associate Analyst — Sept. 2023 - Present

- Supervising the accurate and thorough collection of customer data, including personal and financial information, to establish and verify their identities.
- Developed and validated risk and fraud models to predict and prevent fraudulent activities.
- Reviewed Tax and Immigration process documentation by strictly adhering to KYC, CDD, and AML regulations in all client interactions.
- Produced weekly progress reports and Key Performance Indicators (KPIs) presentations using advanced visualizations to provide insights to the management team.
- Trained new joiners in Excel data analysis techniques and risk and fraud modeling best practices, empowering them to excel in their roles.

Analyst - Process Specialist — Oct. 2022 - Sept. 2023

- Collected customer data, including personal and financial information, to establish and verify their identities.
- Executed Tax and Immigration process through monitoring, evaluating, documentation, and maintaining strict adherence to KYC, CDD, and AML regulations in all client interactions and transactions.
- Carried out customer segmentation by integrating data from risk and fraud models to identify potential vulnerabilities
- Worked closely with colleagues to ensure high-quality services, provided database support, and adhered to company data governance standards.
- Facilitated meetings with cross-functional teams, fostering effective communication and collaboration to streamline processes and improve efficiency.

FOUNTAIN PAYMENT SYSTEMS AND SOLUTIONS
FCT - Abuja, Nigeria

Senior Data Analyst — Feb. 2021 - Aug. 2021

- Conducted advanced statistical and machine learning analyses for transaction patterns.
- Provided leadership, mentoring junior analysts, and guiding fraud detection models.
- Delivered business intelligence reports aiding strategic decision-making.
- Collaborated with cross-functional teams for seamless data integration and compliance.
- Spearheaded the implementation of a data governance framework to enhance data quality.

Associate Data Analyst - Business Intelligence — April 2020 - Jan. 2021

- Developed and monitored key performance indicators (KPIs) for efficiency.
- Conducted in-depth user behavior analysis, providing actionable recommendations.
- Utilized Tableau and Power BI for data visualization and real-time monitoring.
- Analyzed operational processes, identified bottlenecks, and proposed improvements.
- Played a key role in designing and implementing a centralized data repository for improved data accessibility and automation.

Data Analyst - Operations — May 2019 - March 2020

- Ensured data accuracy and integrity through regular audits and checks.
- Assessed and mitigated risks associated with payment transactions.
- Collaborated with compliance teams to integrate regulatory standards.
- Implemented continuous improvement initiatives and stayed updated on industry trends.
- Led the development and implementation of streamlined data entry processes, reducing errors in transaction data.

- Business Intelligence
- Data Visualization
- Statistical Modelling
- Data Cleaning/Wrangling
- Data Automation
- Advance Analytics
- Project Management
- Database Management
- Data Ethics and Privacy
- Experimental Design
- Research

EDUCATION

Masters Degree
Environmental Engineering
Poznan University of Life Sciences
2021-2023

Masters Degree
Agricultural Economics
Ekiti State University
2016-2018

Bachelors Degree
Agricultural Economics
Ekiti State University
2008-2014

CERTIFICATIONS

- IBM Python and R for Data Science
- Google Project Management
- Strategic Management
- Int. Org. Leadership & Behaviour

HUBBIES

- listening to Music
- Enjoy Cooking
- Critical thinking
- Football

EAGLE PAYMENT SOLUTIONS (EAGLEPAYPOINT)

Ado - Ekiti, Nigeria

● Business Data Analyst   July 2018 - April 2019

- Effectively managed project timelines by ensuring the timely delivery of payment system enhancements and updates.
- Conducted in-depth data analysis on payment transactions, producing actionable insights and contributed to the creation of dynamic dashboards for key performance indicators.
- Assisted in the identification and optimization of operational workflows related to payment processing, that contributed to a 10% increase in efficiency.
- Participated in designing and implementing automation solutions by streamlining repetitive tasks that reduced processing errors by 20%.
- Ensured compliance with regulations and standards by adapting policies and procedures in collaboration with legal and compliance teams.
- Assisted in coordinating cross-functional teams, facilitating smooth project execution.

● Junior Business Analyst   Feb. 2017 - June 2018

- Collaborated with stakeholders to understand and document business needs by contributing to the development of comprehensive requirement specifications.
- Documented processes, procedures, and system configurations, maintaining clear and comprehensive records.
- Contributed to financial modeling and analysis, aiding in the evaluation of payment initiatives' impact on overall company finances.
- Assisted in budgeting and forecasting processes, ensuring accuracy and alignment with financial objectives.
- Assisted in the development and execution of test plans, ensuring the reliability and security of payment systems.
- Supported Quality Assurance teams in identifying and addressing issues during testing phases, resulting in a 15% reduction in post-implementation defects.

PROJECTS

Research Associate - Weekend
Poznan University of Life Science   Nov. 2022 - July 2023

- Conducted in-depth time series analysis on climate data, employing advanced modeling techniques to identify long-term trends and patterns.
- Implemented data preprocessing and cleansing procedures using Excel and MySQL.
- Developed forecasting models using R to predict future climate trends, providing valuable insights for climate change impact assessments.
- Applied predictive analytics to assess the potential implications of climate data patterns on future climate scenarios.
- Created and published dynamic visualizations of climate time series data in R by creating charts and graphs that communicated trends and anomalies effectively.

Assistant Project Manager - Volunteer
Lift Humanity Foundation (LHF), FCT-Abuja Nigeria   Oct. 2019 - Aug. 2021

- Supported project development, planning, monitoring, and evaluation that influenced performance strategies.
- Aided in contract preparation and proposal generation.
- Facilitated networking with organizations and enhanced brand image.
- Assisted in desk research and coordinated team tasks to meet deadlines.

Research Assistant - Part - time
Ekiti State University   March 2017 - April. 2018

- Applied factor analysis models to analyze income and investment datasets in line with research objectives.
- Effective applied data collection methods that ensure accuracy and are in compliance with established protocols.
- Conducted hypothesis testing and regression analysis on house income data to identify key influencing variables.
- Created visually impactful data visualizations using Excel and Tableau, aiding in the effective communication of research findings.
